## About

Motivated Artificial Intelligence and Machine Learning undergraduate with a strong background in software development, machine learning, deep learning and natural language processing. Experienced in designing full-stack web applications and AI-based solutions with Python, Java, Flask, TensorFlow, and MongoDB. Eager to work on solving real-world problems with technology and contribute as a Software Developer or AI/ML Engineer.

## Education

### Global Academy of Technology

Bachelor of Engineering in Artificial Intelligence and Machine Learning

- CGPA: 8.17/10 (until 6<sup>th</sup> sem)

### Poornaprajna PU College

Pre-University Education (PCMCs)

- Percentage: 93.16%

### Pragati Vidyalaya Eng Med high School

SSLC

- Percentage: 93.60%

Bengaluru, Karnataka, India

2023 – Present

Udupi, Karnataka, India

Graduated 2023

Uttara Kannada, Karnataka, India

Graduated 2021

## Skills

### Languages

Python, C, Java

### Web Technologies

HTML, CSS, JavaScript

### Frameworks & Libraries

Pandas, NumPy, Scikit-Learn, Matplotlib

### Tools & Platforms

MySQL, GitHub, Jupyter Notebook, VS Code

### Soft Skills

Leadership, Collaboration, Time Management, Communication

## Projects

### Plant disease detector | Python, keras, flask, CNN

2025

- Built a **CNN** based plant disease detection system which can detect stem, leaf and fruit diseases from plant images.
- Used different **CNN** models like **MobileNet**, **ResNet** and **EfficientNet** to train and test the plant images.
- The **MobileNetV2** and **EfficientNetV2B0** gave a perfect balance between accuracy precision and inference time.
- Can capture live plant images and detect the disease.

### Movie Review System | Python, Flask, SQLite, SQLAlchemy, Scikit-learn, HTML, CSS, JavaScript

2025

- Designed a full-stack web application for movie review analysis by integrating **machine learning**.
- Added **OMDb API** for movie search, IMDb ratings and information on movies and implemented a secure authentication, review management, profile page and admin monitorization.
- Used a **trained scikit-learn** model for classifying movie reviews and storing them using **SQLite**.

### Personnel Portfolio Website | Python, Flask, HTML5, CSS3, Tailwind CSS, JavaScript, Render

2025

- Built and deployed a responsive personnel portfolio using **Flask** for showcasing my projects, technical skills, resume and contact details with dynamic routing and a modern user interface.
- Designed a mobile friendly interface using **Tailwind CSS** and an interactive contact section.

### Hybrid Multi-modal Phishing Detection Framework | Python, TensorFlow, BERT, CNN, Isolation Forest, Flask, Scikit-learn

2026

- Built a AI-based phishing detection framework using **BERT**, **CNN** and **Isolation forest** to analyze email, URL and user behaviour.
- Currently designing a multi-modal architecture using feature fusion and explainable AI to detect **zero-day phishing attacks**.
- Will build a Flask based web application and chrome extension for real-time phishing detection.

## Achievements & Activities

- **RepoGenesis 2025** — Competed in a 24-hour National-Level Hackathon, developing an intelligent medical assistant that analyzes handwritten prescriptions using OCR, machine learning, and drug interaction detection.
- **Certifications** — Getting Started with Artificial Intelligence (IBM SkillsBuild), Artificial Intelligence Foundation Certification (Infosys Springboard), Networking Basics (Cisco), Blockchain and its Application (NPTEL)

## Extracurricular

- Participated in 26<sup>th</sup> and 27<sup>th</sup> VTU athletic meet held at Shivamogga and Tiptoor
- Participated in Inter college State level Taekwondo tournament held at BIT and SIT tumkoor.
